

Tuck-It Oil Cooler Relocation Bracket

for 2009+ FLHT, FLHTC, FLHX, AND HD TRIKES

CAUTION: Klock Werks cannot be held responsible for any damage to painted surfaces during the installation of the Tuck-It Oil Cooler. Be sure components are completely cool before disassembly.

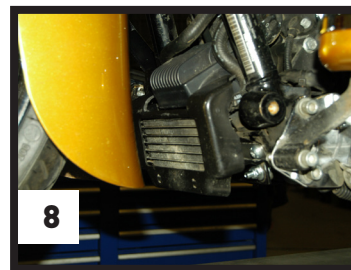

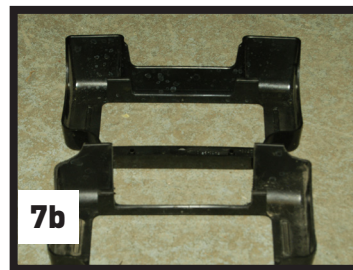

BRACKET AND OIL COOLER INSTALLATION

1. Remove oil cooler cover
2. Remove both 3/8" torx bolts that secure oil cooler to frame
3. Install rubber caps over regulator mounting studs (picture 1)
4. Loosely Install carriage bolts into square holes in Tuck-it bracket
5. Install Tuck-it bracket to frame using bolts removed in step 2 (picture 2)
6. Install spacers onto carriage bolts. One or two 3/8" ID spacers per side as needed.
7. Install oil cooler onto carriage bolts (picture 3)
8. Install 5/16" washers and nylock nuts onto carriage bolts and torque to 22 ft-lbs (picture 4)

OIL COOLER COVER MODIFICATION

1. Using supplied templates, mark oil cooler cover (Pictures 5a, 6a, 7a)
***Note: There are three templates that are directional. One front, one right side and one left side.*
- 2A. Once the cover is marked appropriately, remove the excess material from the oil cooler cover (Pictures 5b, 6b, 7b)
- 2B. The mounting tabs may also need to be trimmed (pic 8)
3. Install cover back onto the oil cooler and ensure cover to regulator clearance.
