

TUCK-IT BRACKET OIL COOLER RELOCATION

Tuck-It Oil Cooler Relocation Bracket allows you to easily move your stock oil cooler and cover back and closer to the frame. For use with long, low front fender applications where extra clearance is needed. Perfect solution for bikes with 23" wheel and raked trees only. Tuck-It is made from stainless steel, making it easy to polish, powder coat, paint, or leave raw without worry of rusting. All necessary hardware included. Trimming of plastic oil cooler cover is required. Complete instructions and trim template included.
