TIRE HUGGER SERIES FRONT FENDERS

Changing your front fender is an easy way to add some personal style! The Klock Werks design team has put together great Tire Hugger Series Front Fender options. Designed to hug your tire closely and let you show off your wheel, these direct bolt-on replacement fenders will dramatically change the look of your bike. Pick a style, send it to paint, bolt it on! The use of 5-axis laser cutting ensures accurate fitment, and the stamped steel with e-coat minimizes any need for bodywork and continues to resist rust and corrosion even after it's painted. We love it when something so simple can make such a big difference, and we think you will too.

All of Klock Werks Front Fenders are stamped from 14 gauge steel using precision, deep-draw stamping technology that ensures a consistently smooth and flawless finish, minimizing bodywork. Laser cut using 5-axis laser technology to ensure accurate fitment for direct bolt-on installation. Klock Werks then goes the extra mile to add e-coat, a process to prevent rust and corrosion. Painters love Klock Werks Fenders and you will too!

Installation requires use of front fender mounting blocks on some models. Some fitments are available as FIT KITS.

FITMENT: 2014+ FLH, 83-13 FLH, Softail, Dyna, Victory and Kawasaki Models.

PRICES STARTING AT \$279.95
