

FLARE™ FOR YAMAHA STRATOLINER

The look and performance of Klock Werks original FLARE™ Windshields – now available for your Yamaha Stratoliner! The same benefits of the original, wind-tunnel tested FLARE™ Windshield. Reduces annoying wind buffeting and adds stability to the front of your motorcycle through proven down force - all while looking stylish! Made from .177 thick Dual Side Hard-coated Polycarbonate. Uses factory mounting hardware.

Klock Werks innovative Flare™ Windshield design features “hips” at the outer edge of the shield that re-route the air to add downforce to the front of the bike, which aids stability vs. using a stock shield. The “flip” at the top of the Flare™ is designed to kick the air up and allow it to flow back as “clean”, less turbulent air for the rider. Klock Werks Flare™ Windshields are made from hard-coated polycarbonate material for added durability. Pre-drilled for easy mounting, and proudly designed and produced in the USA.
