

FIND YOUR FLARE™

SIZE REALLY DOES MATTER

Over the years, we've learned that what works for your buddy might not work for you. Like shoes, one size does not fit all. As a result, Klock Werks now offers a wide selection of sizes for you to choose from. Follow these easy steps below to Find Your Flare™!

In most cases, Klock Werks recommends you choose a Flare™ size that you can look *over* comfortably.

1.

GRAB A BUDDY

To ensure the most accurate measurement, recruit a friend that can assist you with this process. While measuring by yourself is possible, it can be difficult.

2.

GET IN YOUR RIDING POSITION

Sit on your motorcycle, and *get comfortable*. Try to sit like you do when you ride the majority of the time. Remember, the longer we ride the more we tend to slouch which may impact your needed Flare™ size.

3.

MEASURE FOR YOUR IDEAL FLARE™

Place a yard stick horizontally above your top lip. Hold it level (parallel to the ground), and have your buddy measure vertically from the bottom edge up, in the center of the existing windshield, to determine your Flare™ size.

4.

CHOOSE A FLARE™ SIZE

For the best performance, Klock Werks recommends you choose a Flare™ size that is comfortably lower than your line of sight, but not lower than your chin.

STILL NOT 100% SURE WHICH FLARE™ SIZE TO CHOOSE?

The Try It Before You Buy It program is available, in select areas, for you to test ride the Flare™. This ensures you find the best fit for you *and* your ride. To find a dealer near you that offers the program, check out the Dealer Locator at GETKLOCKED.COM.
